

PANON – PROGRAMMIN FRAMEWORK

Our contribution to the development program of Slavonia and Baranja region (and the Croatian) shall be: (a) research activities, (b) the proposed public policies and (c) promote the development of creativity.

Starting out development in transitional and post-conflict societies must be based on the concept of civic moral integrity and respect of: public goods, comparative advantages and professions. Such processes not be initiated or successfully carried out without framework concept, inclusion of a wider circle of experts and the public. Unfortunately - our political parties and governments at all levels do not understand it, so it (unsuccessfully) trying to create (and implement) solutions.

Our contributions in the coming years will be in the proposed program framework; and implementation of the proposed activities will depend on the involvement of a wider circle of experts, local and regional authorities and public support. Because, history and successful community do not **begins** (and ended) with us.
