

JOURNAL "THE ECONOMY"

A production research and development paper in the region has continuity from the appearance of the regional monthly professional journal "The economy" which is 1953 launched the Chamber of Commerce of Slavonia and Baranja in Osijek. The journal is published analysis of business operations in the region, certain branches of economy and large business systems.

Over the years, and especially since the end of the 60's "The economy" intense published supplements (professional and scientific papers) in the field of agriculture and industry, economics, business, technology and business organization bringing together so a hundred contributors - experts (engineers, technologists, economists, lawyers and sociologists) from economic enterprises, research institutions and state and local government and business associations. Unfortunately, after four decades of regular monthly publication "The economy" - which is the last three decades successfully edited MSc. Peter Đidara - ceased publication at the end 1991. This made a big mistake both in economic and in the wider social and cultural significance.

In the area of the region in the mid 70's they started coming out and professional journals which are themed frame covered areas of the business and economic development, and which are issued (2-4 times a year) a major business systems in the region, and their research units and departments; those were the magazines: "Science in Agriculture" (IPK Osijek), "Technician" (Holding "Duro Dakovic") and "Packaging2 (Holding "Belišće"). Unfortunately - and these magazines are stopped out early 90s.
